Subject: International Week "1 week for Climate" (20th – 24th March 2023) Paris Campus
Attachments: ESSCA_Call for Proposals.pdf

Dear partners,
Dear colleagues,

We are pleased to invite you to our **first International Week "1 week for the Climate"** that will take place on our **Parisian Campus** (Boulogne-Billancourt) **from March 19th to March 24th 2023.**

Climate change is already in progress and is accelerating, affecting not only citizens but also global economic activities. Almost all businesses are threatened by the effects of climate change, either directly or indirectly. Students, that will become future leaders and workers, have a major role to play in shifting to a greener economy!

Therefore, the **"International Week – 1 week for climate"** is designed for our **1st year Bachelor of International Management students** in order to raise awareness on how to tackle these environmental challenges. Led by six teachers, this week will combine advanced teachings and research activities in four different areas.

You will find enclosed information on the schedule of the event, as well as the agenda and the terms and conditions of taking part.

We remain at your entire disposal for any further information.

We believe that your contribution will be beneficial, so please feel free to forward this email to your team and partners around!

We are looking forward to hearing from you,

Kind Regards,

International Relations Department
